

• Alte OP: pindene tups estato $O(1)$ e quando le implementa

$\rightarrow O(m + \log m)$ -

Exercice n° 2 (ex)

① $S = \{x\}$ $d[x] = 0$

$y \in V - S$

$d[y] = 0 + 5$

$d[y+]=0 + 10$

$d[z] = d[y] + 2 \Rightarrow d[z] = 7$ $d[z] = 7$

~~$d[x] = \infty$ $\forall x \in V - S$~~

seleto de $(x, y), (x, z)$

~~$S = \{x\}$ $d[y] = 5$~~

~~$S = \{x, y\}$ $d[z] = 10$~~

~~$S = \{x, y, z\}$~~
